

Production Roadmap

Bible Time Travelers | Proposed next steps and scope-based planning

The first season is written and an animatic is available. Proposed milestones depend on partners, scope and financing; timing, deliverables and costs remain to be agreed.

Milestones to develop with partners

01 Align the scope

Review scripts and the animatic. Agree on the episode package, creative approach, responsibilities and deliverables.

02 Build the working plan

Obtain partner estimates. Define a budget, schedule, review stages and financing needs before production commitments.

03 Prepare for production

Refine designs, storyboards and animatic revisions. Plan voice, sound and the production workflow.

04 Produce and review

Advance through approved stages, with agreed review points for animation, sound, editing and completion.

05 Package for delivery

Check agreed masters, captions, artwork and delivery materials. Pursue platform and distribution review separately.

Cost categories to confirm

Development and preproduction: script work, design, storyboards, animatic revisions and planning.

Production: animation labor, supervision, scene assembly and production management.

Finishing and delivery

Audio and postproduction: voice, music, sound, editing and finishing.

Completion: quality checks, captions, deliverable preparation and an agreed contingency allowance.

Request the current budget and assumptions

Contact Gail for a detailed budget discussion, current estimates and the proposed schedule. Ask which costs are quoted, which remain estimates, and what each milestone would deliver. No dates or amounts are confirmed in this public roadmap.
